

Interior designer decorates Ronald McDonald house

by DJC Staff

Published: December 17th, 2008

The Ronald McDonald House on the Legacy Emanuel Hospital campus is now festively decorated thanks to a local interior design firm.

For the ninth year in a row, Andrea Bainbridge, founder of the firm Bainbridge, has donated funds as well as an afternoon of staff time to purchase and install holiday decorations throughout the nonprofit's lobby, including a red-garlanded holiday tree. The Ronald McDonald house provides a home to families and seriously ill or injured children who have traveled far to receive treatment at the hospital.

The Bainbridge firm provides interior design services for commercial, education, health care, housing and other projects.
